

Chubb Survivafile

1 & 2 Hour Fire Protection File

Chubb has long been a world leader in the development of fire resisting equipment, with products designed to withstand the most severe fires and the resulting damage. The Survivafile has successfully achieved the Underwriters Laboratories, USA, Standard UL 72, Class 350 for both 1 and 2 hour fire endurance and combined explosion (quick heating) and fire impact tests.

SPECIFICATION

General Construction - The body with an overall thickness of 56 mm and drawer front is insulated with Chubb PCDE fire resisting material (no asbestos used in the Survivafile), which is aerated, stable and does not deteriorate with age. The file is reinforced in vital areas to withstand the impact of a fall.

Locking - Several options are available using both a keylock and 3 wheel keyless combination lock

- one keylock on top drawer locking all drawers
- one keylock and one 3 wheel keyless combination lock on top drawer giving control on all drawers
- individual locking on any drawer by one keylock, or one keylock and one combination lock.

Type of keylock for 1 hour file : Hudson Lock
2 hour file : Chubb Avalock

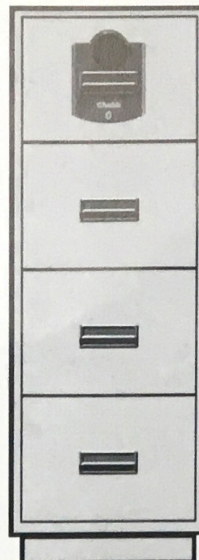

Drawer Controls - A simple mechanism on each lower drawer, operated by the user, controls whether that drawer is interlocked with the top drawer or is independent.

Drawers - Drawers are fitted with heavy duty ball bearing runners for smooth operation, and require no lubrication.

Fittings - All drawers include provision for hanging suspension files as standard.

Finish - light grey texture finish, with dark grey door furniture.

DIMENSIONS

2 - drawer		3 - drawer		4 - drawer		
817 mm		1160 mm		1504 mm		HEIGHT/OUTER
