High Security Safes - Super Strength Protection

The World's Trusted Safe

**HIGH SECURITY TDR SAFE**  
Torch and drill resisting

**BURGLARY RESISTANCE**  
The strength to protect

**FIRE RESISTANCE**  
Excellent fire protection

The Treasury safe is a certified professional grade safe designed to give a higher level of protection for those wanting to safeguard large sums of cash, quantities of jewelry and other valuables.

The hidden strength in this superior quality safe is the new and improved hi-tech concrete barrier materials used in both the body and door whilst also incorporating the most advanced security features in safe security.

We believe the Treasury safe to be of a far superior strength to those used by our competitors. It has been designed and built to give a high degree of resistance to all known forms of attack because today's ordinary safes cannot withstand the varied and powerful tools used by the modern day burglar.

This high quality TDR safe is perfect for environments where a high level of security is required, such as banks, jewellers, financial institutions and commercial or home applications.
